DETAILED ACTION

1. 1 claim has been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Desmond et al. (U.S. Patent Number 6269337) in view of Hanson et al., (U.S. Patent Application Publication Number 2002/0143560).

Referring to claim 1, Desmond et al. is directed to a system and method of sharing directory listings in a distributed environment using a computer network comprising:

maintaining a database including a plurality of directory listings (Desmond et al., Figure 2 "Enhanced Information DB" 440, and column 3 line 44-56), wherein each listing is associated with a referral phone number (Desmond et al., column 3 line-50-54) and at least one keyword ("enhanced directory assistance information" Desmond et al., column

Art Unit: 2162

4, line-1) publishing directory listings into a shared data system (Desmond et al., column 3 line-58 through column 4 line-14);

receiving a directory assistance request in the form of a keyword from the customer (Desmond et al., column 3 line-44-56);

identifying the directory listings from the shared data system (Desmond et al., column 4, line-1-26);

having keyword terms generating a match with the request (Desmond et al., column 4 line-1-14+); and

selecting one of the directory listings (Desmond et al., column 4 line1-14).

Desmond et al. does not explicitly disclose that the said system and method comprises associating each listing with a bid amount, including a directory owner who is willing to pay for a single phone referral, ordering the identified directory listings into a phone number result list in accordance with the values of the bid amounts for the identified directory listings, generating a paid referral business transaction and associating it with the listing owner's advertising account, and generating one or a plurality of derivative business transactions to execute the business processes involved in the referral transaction.

However, Hanson et al. teaches a method for matching goods and services of different vendors with potential buyers wherein:

each listing is associated with a bid amount ("fee" , Hanson et al., paragraph 40),

a directory owner is willing to pay for a single phone referral ("vendor advertisement"),

the identified directory listings is ordered into a phone number result list in accordance with the values of the bid amounts for the identified directory listings (“placing the advertisement first in the list of advertisements”, Hanson et al., paragraph 0040),

generating a paid referral business transaction and associating it with the listing owner's advertising account (“fee schedule”, Hanson et al., Paragraph 0040), and generating one or a plurality of derivative business transactions to execute the business processes involved in the referral transaction (Hanson et al., Paragraph 0040).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to combine the system and method for enhanced directory assistance taught by Desmond et al., with the system and method for fee-based listing taught by Hanson et al. so that the combined system and method would comprise all the steps specified in the claim. One would have been motivated to do so in order to generate revenue for the enhanced directory assistance service.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis Myint whose telephone number is (571) 272-5629. The examiner can normally be reached on 8:30AM-5:30PM Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Breene can be reached on (571) 272-4107. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
